

AZAAM

Game Localization Specialist | Arabic Game Translator

Arabic Game Localization Portfolio

I am a Game Localization Specialist focused on Arabic game localization. My work covers full game translation, context-aware adaptation, terminology consistency, character voice, UI clarity, lore, item descriptions, dialogue, and gameplay text. I work to make Arabic localization feel native to Arabic-speaking players while preserving the original identity, atmosphere, humor, and narrative style of each game.

Primary focus	Arabic game localization, translation, review, and in-game text adaptation
Main goal	Collaboration with game developers, publishers, and localization teams for official Arabic localization
Project scale	Full unofficial localizations up to approximately 85,000 strings, plus official Crowdin contribution
Working style	Natural Modern Standard Arabic, tone preservation, context-aware translation, consistency, and playability

Project Highlights

Don't Starve Together - Arabic Localization Mod

Full unofficial Arabic localization | Approx. 85,000 strings | Published on Steam Workshop

Link: [Steam Workshop](#)

- Translated a large-scale survival game text database covering UI, dialogue, item descriptions, crafting text, lore, world events, and gameplay systems.
- Preserved the game's dark, strange, and humorous tone while keeping Arabic text readable and natural.
- Maintained terminology consistency across survival mechanics, characters, combat, events, and item categories.
- Worked with localization/mod files and tested translated strings in-game for clarity and consistency.

Don't Starve - Arabic Localization Mod

Full unofficial Arabic localization | Approx. 44,000 strings | Published on Steam Workshop

Link: [Steam Workshop](#)

- Delivered a complete Arabic localization for the original Don't Starve.
- Kept terminology aligned with Don't Starve Together to build a consistent Arabic experience across both games.
- Adapted survival mechanics, character lines, item names, world interactions, and UI text into polished Arabic.

Obscure (2005) - Arabic Localization

Full unofficial Arabic localization | Approx. 3,000 strings | Showcased on YouTube

Link: [YouTube Showcase](#)

- Localized story, dialogue, menus, and gameplay text for a classic survival horror game.
- Focused on preserving tension, character dialogue, puzzle clarity, and horror atmosphere.
- Reviewed the translation through gameplay context to reduce awkward or literal wording.

ObsCure II: Aftermath - Arabic Localization

Full unofficial Arabic localization | Approx. 3,000 strings | Showcased on YouTube

Link: [YouTube Showcase](#)

- Localized dialogue, menus, and in-game text while maintaining continuity with the first Obscure project.
- Adapted tense horror scenes, character voice, and gameplay instructions into natural Arabic.
- Focused on context-based translation rather than line-by-line literal wording.

Traveller’s Rest - Arabic Localization

Official Arabic localization contribution | Approx. 8,000 strings | In progress on Crowdin

- Working within the official Crowdin localization workflow.
- Translating tavern management, crafting, farming, customer dialogue, item descriptions, UI text, and gameplay systems.
- Following translator notes and project style guidelines, including gender-sensitive localization tags when needed.
- Maintaining consistent terminology across systems, items, crafting, tavern management, and character dialogue.

Localization Approach

- Context before words: I translate based on gameplay situation, character voice, tone, and player experience.
- Natural Arabic: I use clear Modern Standard Arabic that fits games without sounding stiff or machine-like.
- Tone preservation: horror remains tense, comedy remains sharp, lore remains atmospheric, and UI remains practical.
- Consistency: terminology is tracked across items, systems, characters, world mechanics, and repeated UI actions.
- Player-first UI: short functional strings are localized for clarity, speed, and readability during gameplay.

Technical Localization Skills

Game localization testing	PO file workflows	Crowdin workflow
Steam Workshop publishing	Large string databases	Arabic proofreading
UI and system text	Lore and dialogue adaptation	Terminology consistency

Translation Samples

Narrative / Lore Sample - Don't Starve Together

Original

While toiling away in his home laboratory late one night, Wilson was startled to hear a voice on the radio speaking directly to him. At first he feared he'd gone mad from too many late nights of experiments and accidentally-inhaled chemical fumes, but the voice assured him that it was no mere figment of the imagination. In fact, the voice had a proposition for him: if Wilson would build a machine according to their specifications, then he would be rewarded with secret knowledge, the likes of which no one had ever seen. Casting aside his better judgement, Wilson threw himself into constructing the machine. When at long last it was finally completed, the gentleman scientist had a moment of hesitation... But at the voice's insistence, Wilson flipped the switch and activated his creation... and was never seen again. Well, at least not in this world.

Arabic Localization

بينما كان ويلسون يكّد في مختبره المنزلي في ساعة متأخرة من الليل،
فُوجئ بسماع صوتٍ في الراديو يخاطبه مباشرة.

في البداية خشي أن يكون قد فقد صوابه بسبب ليالي التجارب الطويلة
وأبخرة المواد الكيميائية التي استنشقتها دون قصد، لكن الصوت أكّد
له أنه ليس مجرد وهمٍ من خياله.

بل إن للصوت عرّضاً: إن قام ويلسون ببناء آلة وفقاً لمواصفاته،
فسيكافاً بمعرفةٍ سرّية لم يرَ أحدٌ مثلها من قبل.

وبطارقاً حكمته جانباً—فما الضرر الذي قد ينجم عن صفقةٍ غامضة
مع صوتٍ مجهولٍ بلا جسد؟—اندفع ويلسون بكل حماسة لبناء الآلة.

وعندما اكتمل العمل أخيراً، تردّد العالم المهذّب لحظةً واحدة...
لحظةً كان من الممكن أن تنقذه من مصيره القادم، لو امتلك
قليلاً من قوّة الإرادة.

لكن بإلحاح الصوت، ضغط ويلسون على المفتاح وفعل اختراعه...
ولم يرَ بعدها مرةً أخرى.

حسنًا... على الأقل، ليس في هذا العالم.

Character Lore Sample - Don't Starve Together

Original

Wendy's tale of woe began with the untimely loss of her dear sister Abigail. Unable to accept the thought of life without her twin, Wendy began turning to the occult in the hopes of finding some way to communicate with the other side. After much trial and error, seance candles burned down to nubs and spirit boards thrown away in frustration, Wendy was nearly ready to give up and fall into despair... until finally, there was a sign. A ragtime tune might seem like a strange message to send from the great beyond, but Wendy was desperate to grab hold of anything that might bring her closer to her sister. And sure enough, a voice would soon tell her exactly what she needed to do...

Arabic Localization

بدأت حكاية معاناة ويندي مع الفقد المبكر لأختها العزيزة أبيغيل.
وعاجزةً عن تقبُّل فكرة الحياة دون توأمها، لجأت ويندي إلى الخفايا
أملًا في إيجاد وسيلةٍ للتواصل مع العالم الآخر.

وبعد محاولاتٍ لا تُحصى، وشموع استحضرٍ ذابت حتى آخرها،
وألواح أرواح أُلقي بها جانبًا يأسًا، كادت ويندي تستسلم
وتغرق في اليأس...

إلى أن ظهر أخيرًا دليلٌ ما.

قد تبدو نعمة راغتايم رسالةً غريبة قادمة من ما وراء الموت،
لكن ويندي، في يأسها، تشبَّثت بأي شيء قد يقربها من أختها.
وسرعان ما جاءها صوتٌ، يخبرها تمامًا بما يجب عليها فعله...

Short Gameplay/UI Samples

Original	Arabic Localization
The Gnaw's demands know no end.	مطالب النَّهَّاش لا تنتهي.
Aha! I used the secret knowledge to build a device! Why does this feel familiar...	آها! استخدمت المعرفة السرية لبناء جهاز! لماذا يبدو هذا مألوفًا...
Seize foes and keep them rooted in place while wearing Brightshade Armor.	ثبَّت الخصوم في أماكنهم أثناء ارتداء درع الظل الساطع.

Professional Goal

I am looking to collaborate with game developers, publishers, and localization teams to provide high-quality official Arabic localization for games. My focus is on accurate, natural, and immersive Arabic localization that respects the original creative direction and improves the experience for Arabic-speaking players.

Note: Unofficial localization projects listed here are fan-made localization work and are not affiliated with the original rights holders unless stated otherwise.
